SKILL RECORD

2026

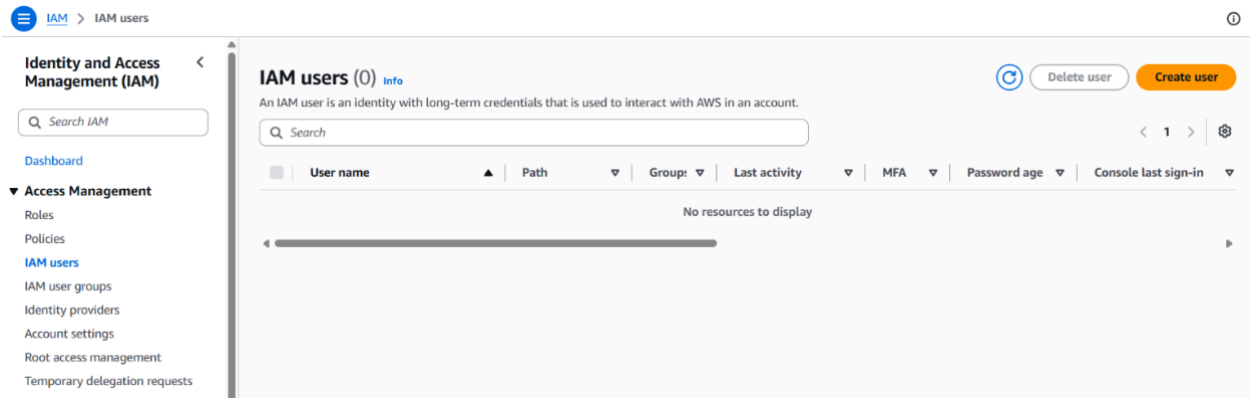

1. Create an IAM user with programmatic access only, download the access key and secret key, and document the steps with screenshots.Then set up a billing alert for the account so that an email is received when the Free Tier limit is about to be crossed.

Description of IAM (Identity and Access Management)

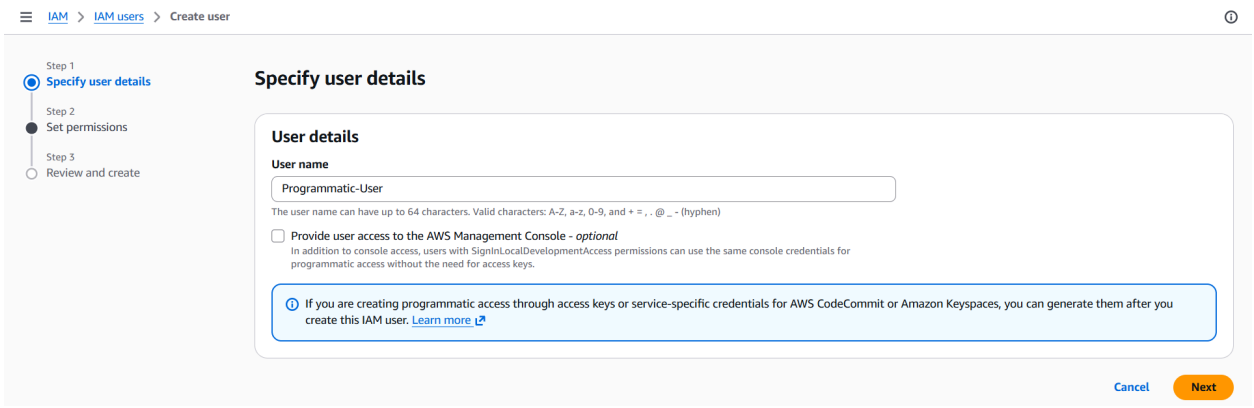

IAM (Identity and Access Management) is a security framework used to manage digital identities and control access to computer systems, applications, networks, and cloud resources. It ensures that only authorized users can access specific resources based on their roles and permissions.

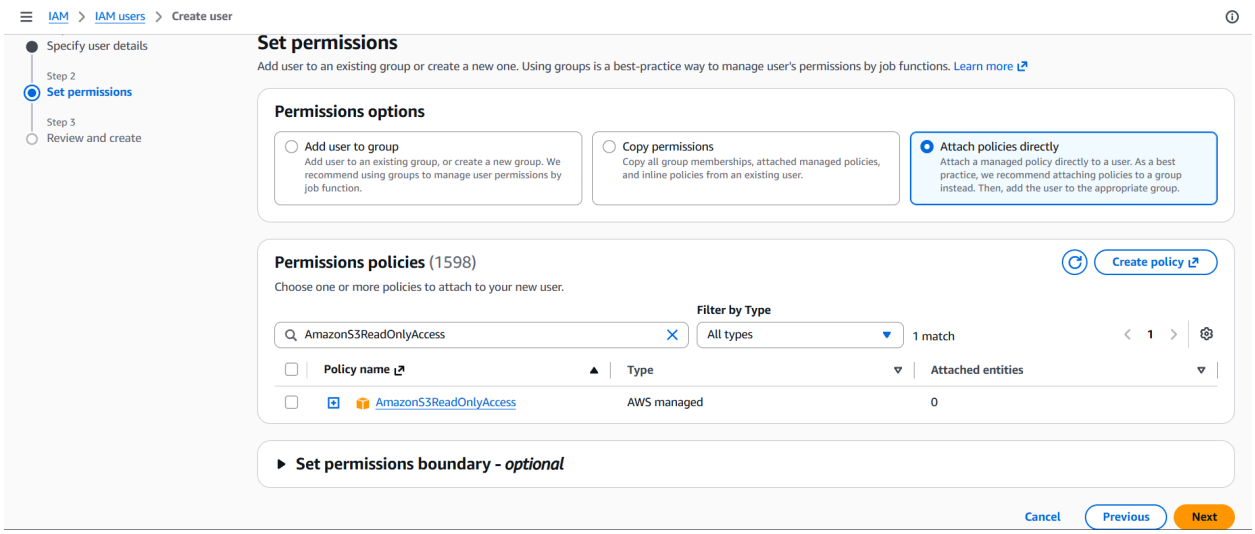

IAM helps organizations protect sensitive information by authenticating users and authorizing their access to resources.

Step 1: Sign into IAM and click Create User

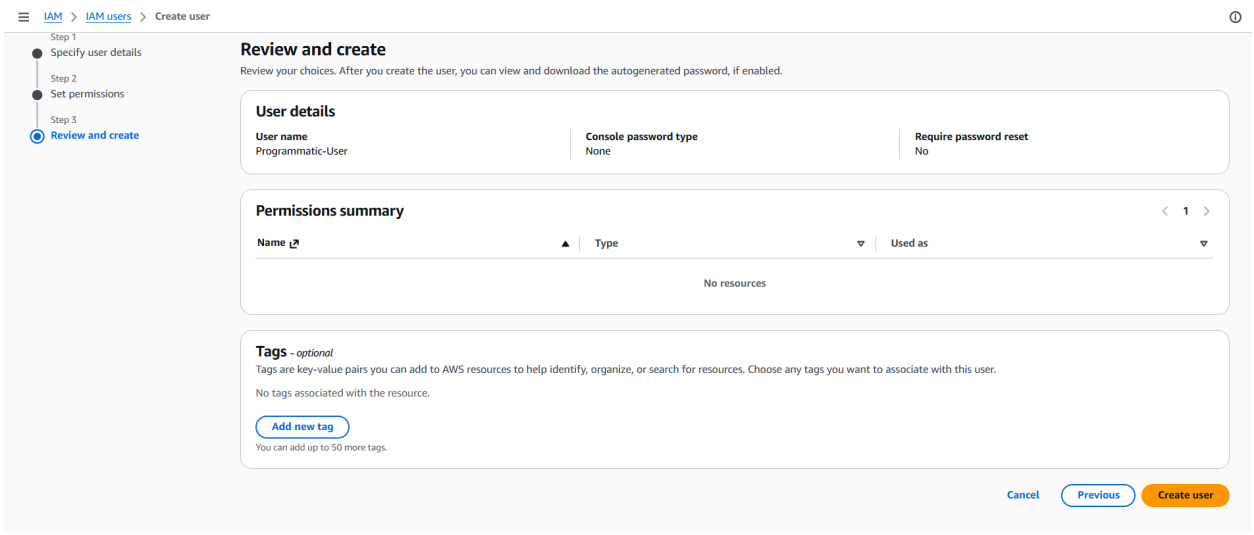

Step 2: Specify the user details and give permissions

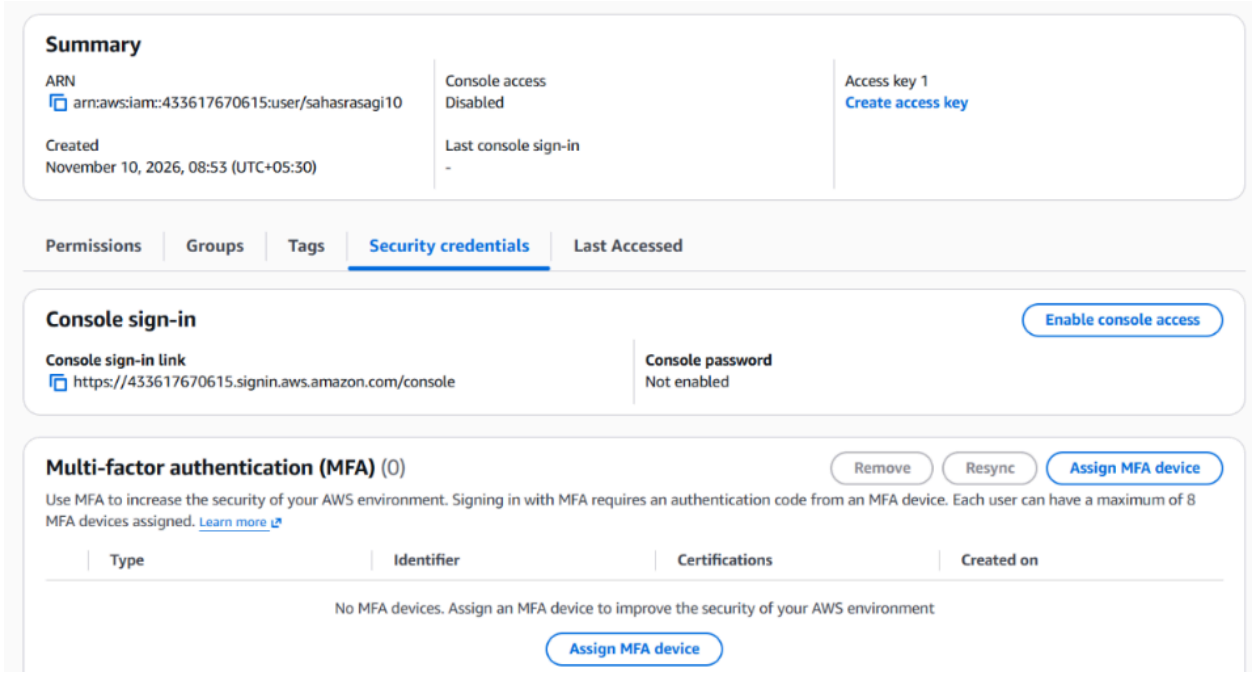

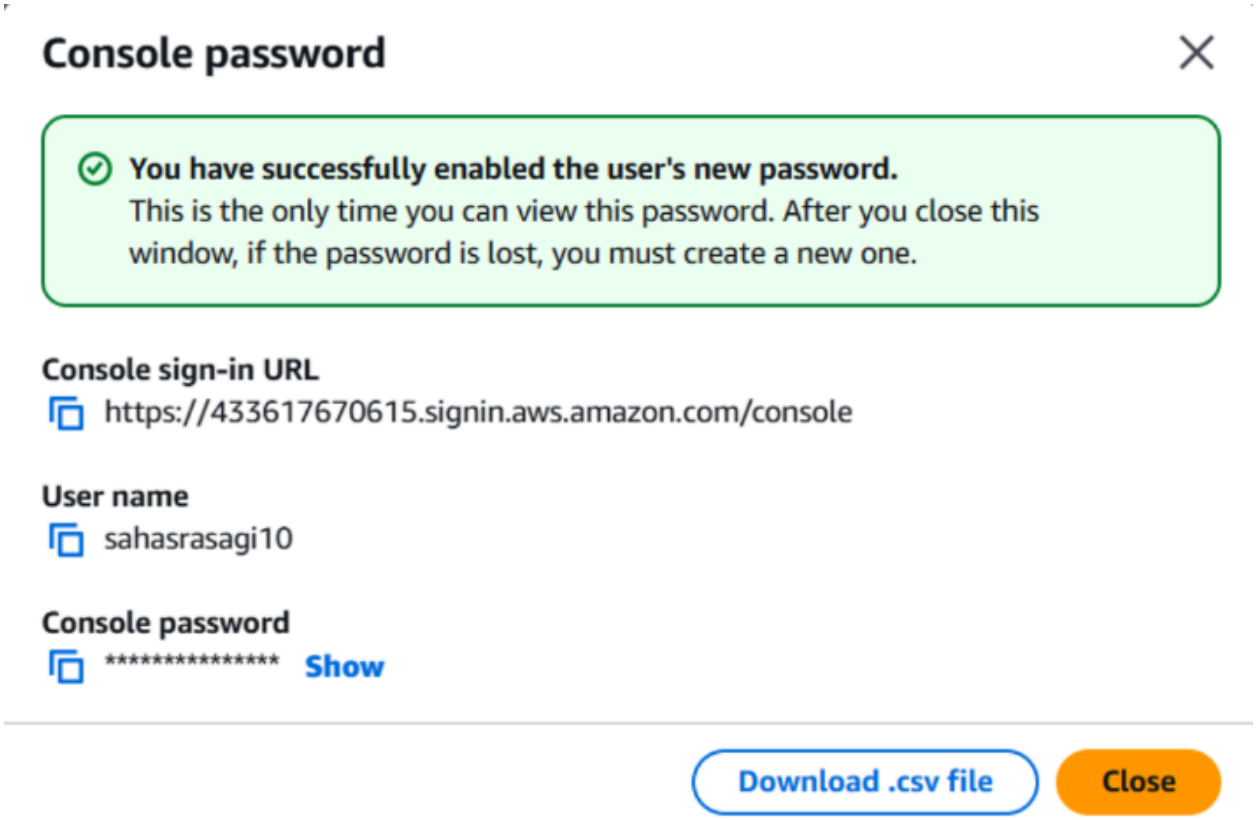

Step 3: The user is created and click the username

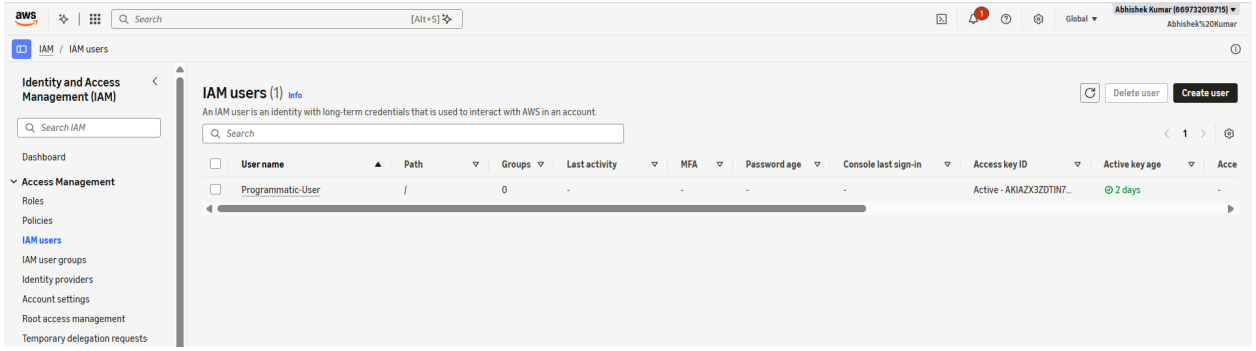

Step 4: Go to Security Credentials and create password

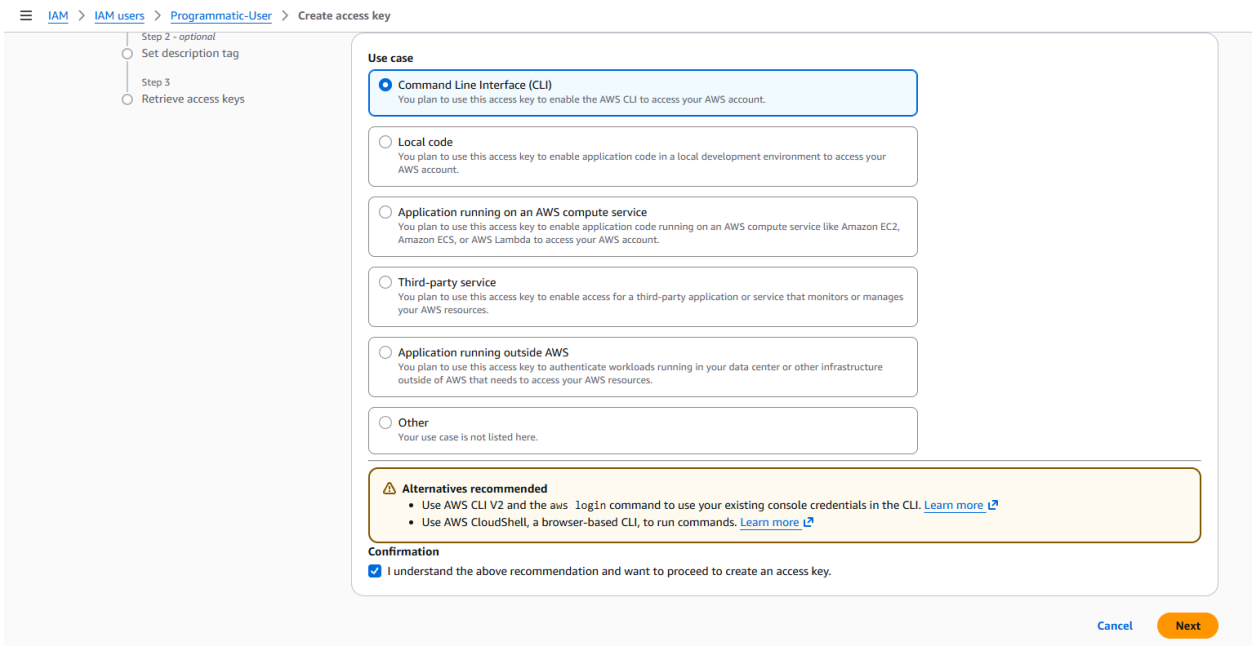

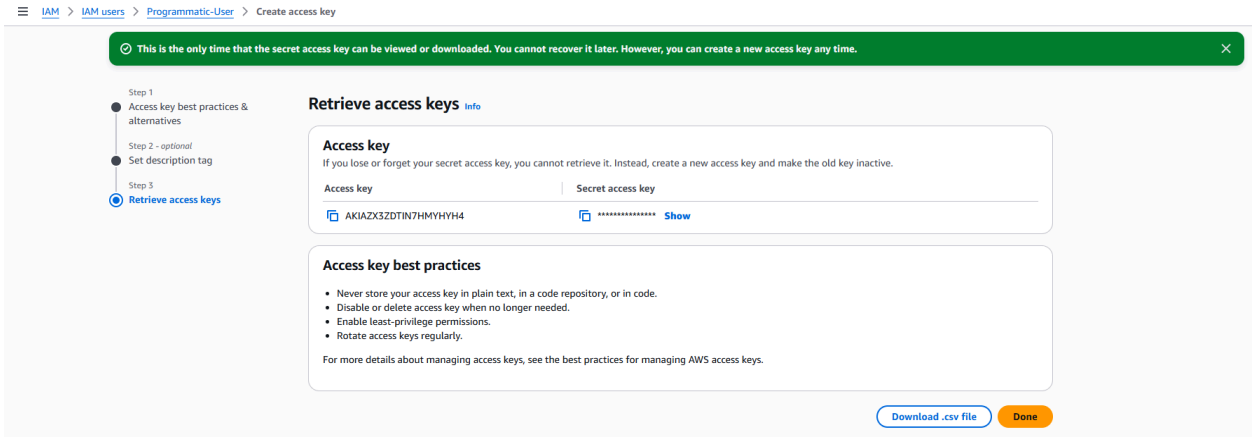

Step 5: Click the username

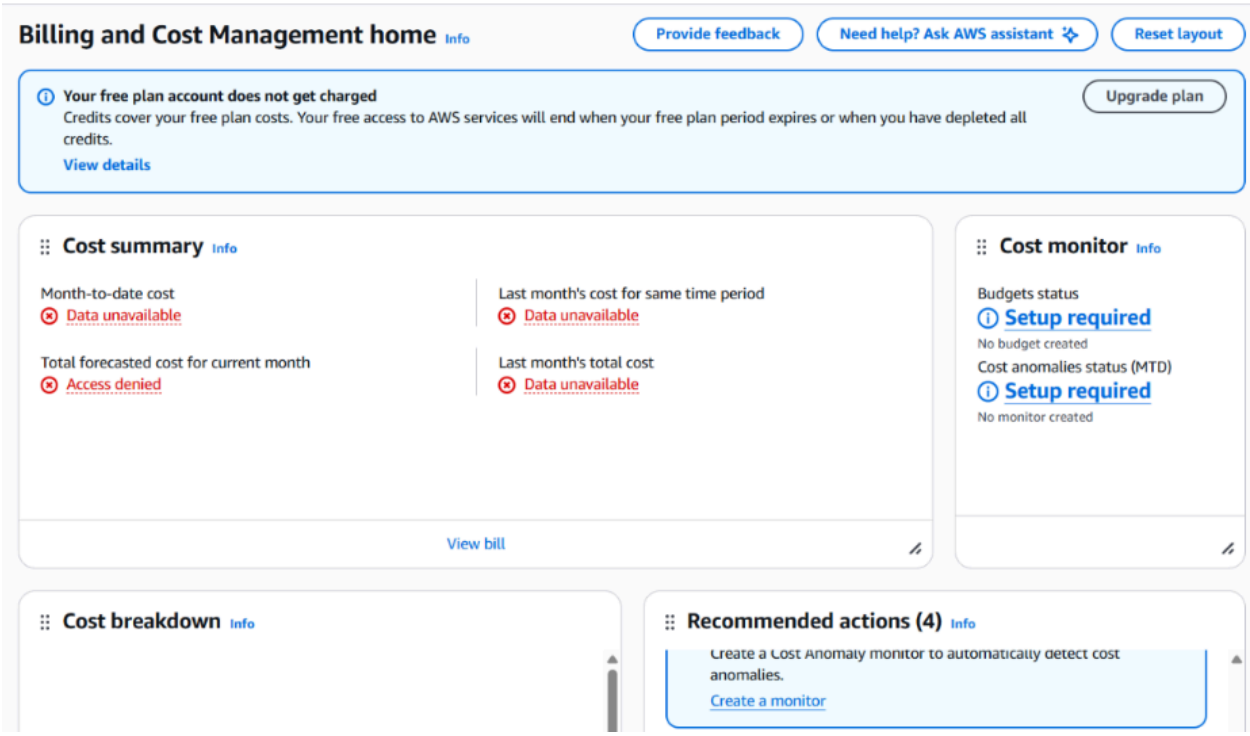

Step 6:Create access key using Command Line Interface

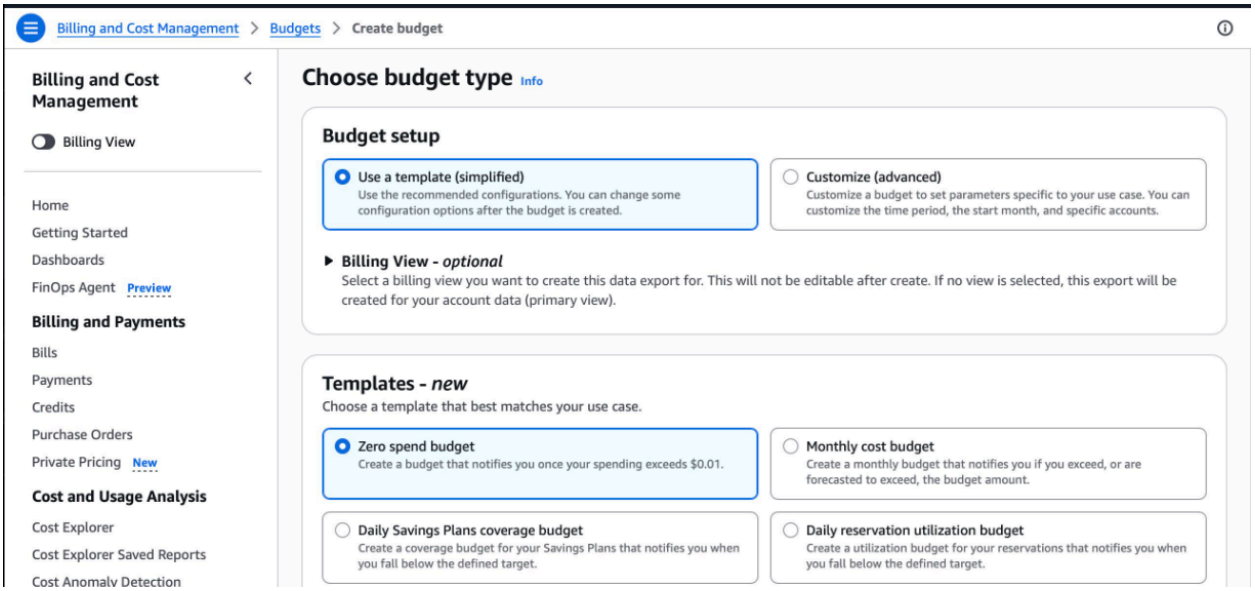

Step 7: Download the csv file

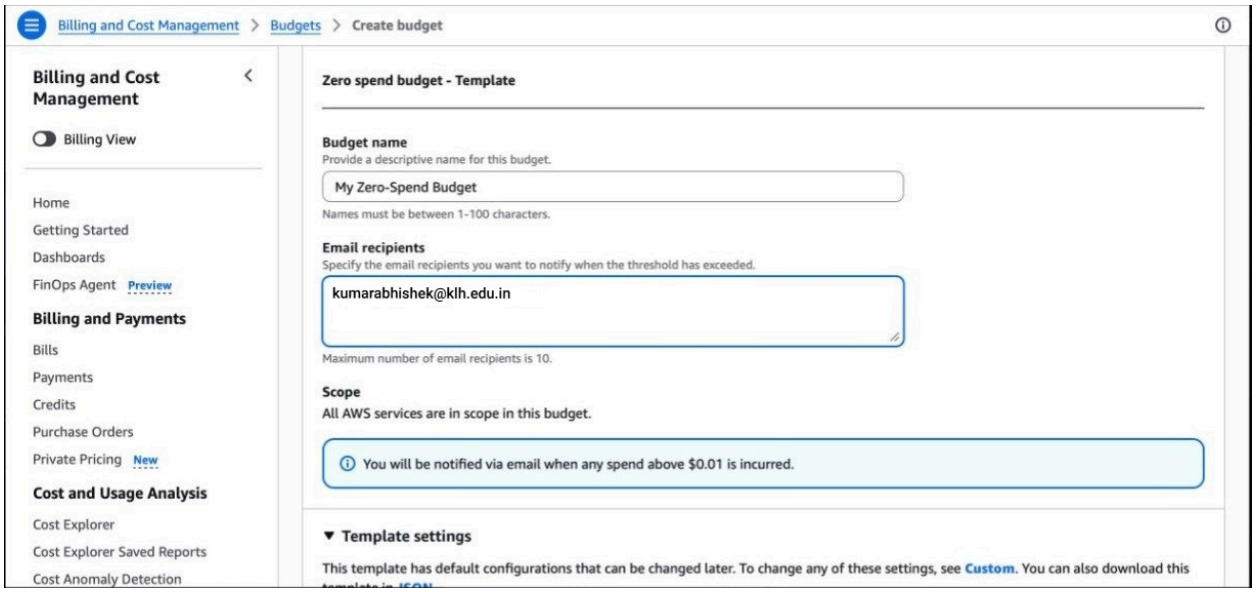

Step 8: Go to Billing and Cost Management

Step 9: Choose budget setup as Use a template and then click Zero Spend Budget

Step 10: Enter budget name and email recipients

Step 11: Budget is created
